Research has establish that personality is the single most important factor in determining one's compatibility to and happiness in a particular job or career. Studies have also determined that an analysis of handwriting is a viable, non-discriminatory procedure in understanding an individual's personality for such purposes. The results can be invaluable in identifying: hidden talents or potential, interests and motivations, and can be utilized in career development, self-improvement and in team building activities. The analysis results will be used in conjunction with other data, tests, observations and job-related information to facilitate human resource decisions.
